RE: Comments regarding Board meetings outside the County seat

Discussions regarding Board of Supervisor meetings outside the Yreka area have been discussed and pursued in the past. Issues discovered at that time included the ability to find locations that were ADA accessible, access to tables/chairs and security. Some of these issues may have been resolved since that time, but could potentially still be an issue for the Board's consideration.

If the Board were to decide to move forward with off-site meetings, I would request that the agendas be light to allow adequate time for staff to travel to and from the various locations during normal work hours. As you are well aware, the Clerk/Elections Department, along with Provisions, have had the expenses of two Special Elections which has greatly impacted the department's overtime budget.

Thank you for your consideration.
