

2019

SISKIYOU COUNTY FIRE DEPARTMENTS ANNUAL REPORT

PRESENTED BY:

SKU Early September Lightning Complex

CASKU007018

September 4, 2019

In 2019, we were able to breathe a little easier than in years past. There were less smoke-filled days in Siskiyou County because of reduced wildland fire activity. This was partly due to a favorable, “wet” winter and spring followed by a mild summer with only a few days above 100 degrees.

On Wednesday, September 4th, 2019 we experienced a weather event that brought wide spread lightning to the area. The National Weather Service in Medford, Oregon had issued a Red Flag Warning for a potential dry lightning weather event, lightning with little to no precipitation and/or lightning strikes outside of the rain core, dramatically increasing the chance of new fire starts. Following the storm, a high-pressure system covered the County which increased the temperature and lowered the relative humidity. On Saturday, September 7th, the high-pressure system was replaced by a low-pressure system that brought lower temperatures and strong south winds. The wind contributed to rapid fire growth across the County by fanning the flames of the small and/or previously undetected wildland fires.

There were 391 lightning strikes recorded for the evening of September 4th into the morning of September 5th. This is not a significant number of lightning strikes for Siskiyou County as we have experienced previous storms that produced thousands of lightning strikes. What is remarkable about this event is that 62 fires ignited in less than 12 hours. This means that 1 out of every 6 lightning strikes resulted in a wildland fire somewhere in the county. The Yreka Interagency Command Center created a complex for this series of lightning fires called the “SKU Early September Lightning Complex”. This allowed a single incident number

to be used for efficient ordering of resources, better fiscal tracking and resource accountability. The lightning complex required mobilization of local, regional, state, federal and out-of-state resources. Nearly all Siskiyou County local fire departments participated during the complex by augmenting the initial and extended attack resources required to control and extinguish the fires.

There were 62 confirmed lightning fires in the days following the initial storm. Early detection of the fires by reconnaissance aircraft, lookouts and citizens allowed fire fighters to contain most of the fires at less than half acre each. A few fires grew larger due to challenges with the fuel type, weather, steep terrain, inaccessibility or the lack of available resources. The largest fires were the “Lime”, “Kidder”, “Duzel”, “Vista”, and “Colliers” incidents. At the peak of the “Lime” fire there were 18 crews, 16 fire engines, 15 dozers, Type II Incident Management Team and numerous overhead personnel assigned. The “Lime” fire burned 1872 acres, which was the largest fire in Siskiyou County for 2019 and much smaller in comparison to the 2018 “Klamathon” fire that burned over 38,000 acres.

One of the most important contributing factors to our successful fire season was the proactive and aggressive firefighting by all of our local fire departments that committed their personnel time and equipment to quickly contain and control the wildland fires in the County.

COUNTY OF SISKIYOU FIRE WARDEN

Phillip R. Anzo

1809 Fairlane Road • P.O. Box 128, Yreka, CA 96097

Phone: (530) 842-3516 • Fax: (530) 842-7952

Memorandum

To: Siskiyou County Board of Supervisors

Date: March 20, 2020

From: 
Phillip R. Anzo
County Fire Warden

Subject: Serving the Citizens of Siskiyou County

Honorable members of the Board, my goal is to provide for a system of fire protection services to all areas of the County by administration of mutual aid agreements, including the Amador plan, and by providing each fire agency with emergency response resources and support when needed in the service of the citizens of Siskiyou County. As the appointed Siskiyou County Fire Warden, Department Head for Siskiyou County Service Area-4 (CSA-4) and Siskiyou General County Fire (GCF), I perform the duties and expectations in relation to fire incidents, fire protection and fire prevention as required by the Board of Supervisors. I appreciate the opportunity to serve the citizens of Siskiyou County.

CSA-4 provides extended County services of structural fire protection, as well as other fire related services for the protection of life and property outside of cities and existing fire protection districts. CSA-4 encompasses four "Fire Zones" and four "Hose Companies". The Fire Zones have a special tax assessment for their area and include Hammond Ranch, McCloud, Mt. Shasta Vista and Pleasant Valley. The Hose Companies are donation based and include Hilt, Klamath River, Salmon River and Seiad Valley. CSA-4 has an Advisory Board that meets quarterly to discuss fire service goals, challenges and safety. The Advisory Board continues to work on improving the fire protection services provided within each coverage area.

Dispatch services are provided by CAL FIRE through a Fire Protection Reimbursement Agreement (Schedule A) for two Communication Operators allowing YICC to provide 24 hour, wide-awake 9-1-1 service to the public. The Yreka Interagency Command Center (YICC) is the single 9-1-1 answering point for all fire and medical emergencies for the County. The YICC dispatched 10,412 emergency incidents in 2019, with 6954 emergency incidents on behalf of volunteer fire departments and 607 emergency incidents within CSA-4.

The County of Siskiyou also provides extended County services of structural fire protection through a Fire Protection Reimbursement Agreement with CAL FIRE. The agreement funds two firefighter positions, facilities and equipment reimbursement to provide fire protection by CAL FIRE outside of the declared fire season (Amador).

GCF maintains an inventory of emergency preparedness and response equipment that includes; fire engines, mobile air compressor trailers, hazardous material decontamination trailers, mass-casualty trailers and brush chippers. These items are used throughout the county in support of emergency incidents, training, fuel reduction projects and special events. The fire engines are often rented by the State in support of fire emergencies which has created an annual revenue source which has generated \$53,350 in the 19/20 fiscal year. A portion of these funds are then reinvested in equipment maintenance and replacement costs to maintain emergency response capabilities.

"To provide for a system of fire protection services to all areas of the County"

A Message To The Honorable Siskiyou County Board of Supervisors

The Siskiyou County Fire Chiefs Association (SCFCA) have been very busy this year with some very big projects to enhance Siskiyou County's fire departments. While the SCFCA is all volunteer, we have focused our effort to make our departments more effective within and outside our boundaries.

The following is a list of our current efforts and projects:

1. GIS platform for information and safety sharing with available pre-plans, forms, at-risk residents, high fire danger areas, current fuel reduction projects, station locations, etc.
2. District expansion, creating a process that any fire protection district can follow to get Siskiyou County residents within a fire district so they can get affordable Insurance.
3. Working on a MOU with the College of the Siskiyous to expand our training delivery and raise the scope of training for all fire departments.
4. SCFCA is part of a peer review along with CAL FIRE and USFS to approve local government fire fighters into the California Incident Command Certification System so we can fulfill needs and requests for a going fire or incidents state wide.
5. Developed a "Strike Team Expectations" document for engines, equipment, and strike team leaders responding in or out of county, addressing all requirements including training.
6. Recruitment and retention plan for the county to obtain more volunteer fire fighters.
7. Updating all Automatic aid agreements to include the county/state dispatch services.
8. Working on an open house for many north county fire departments to inform and educate home owners on how to decrease risks associated with wildfire through home hardening and defensible space.
9. Provide fire prevention information to home owners at the Siskiyou County Golden Fair.

The SCFCA represents Siskiyou County's fire departments and is run by the chiefs of our departments. We support each other through information sharing, training, prevention, volunteer retention and legislation. We welcome the Board of Supervisors to join our meetings.

Thank you for your continued support of the fire service in Siskiyou County and a special thank you for your contribution towards the Siskiyou County Fire Fighter of the Year appreciation dinner.

vimeo.com/siskiyoufirechiefs

A part of the SCFCA is to embrace technology and equipment. Started in 2013 with the launch of our Facebook, Twitter, Vimeo and revamped website. Bringing these tools online not only helps with cooperation between all fire companies but it provides the SCFCA a tool to present information to the public.

Our Twitter page focuses mainly on the dispatch information. Using any mobile device or a desktop you can quickly look to the page to find out where emergency responders are heading.

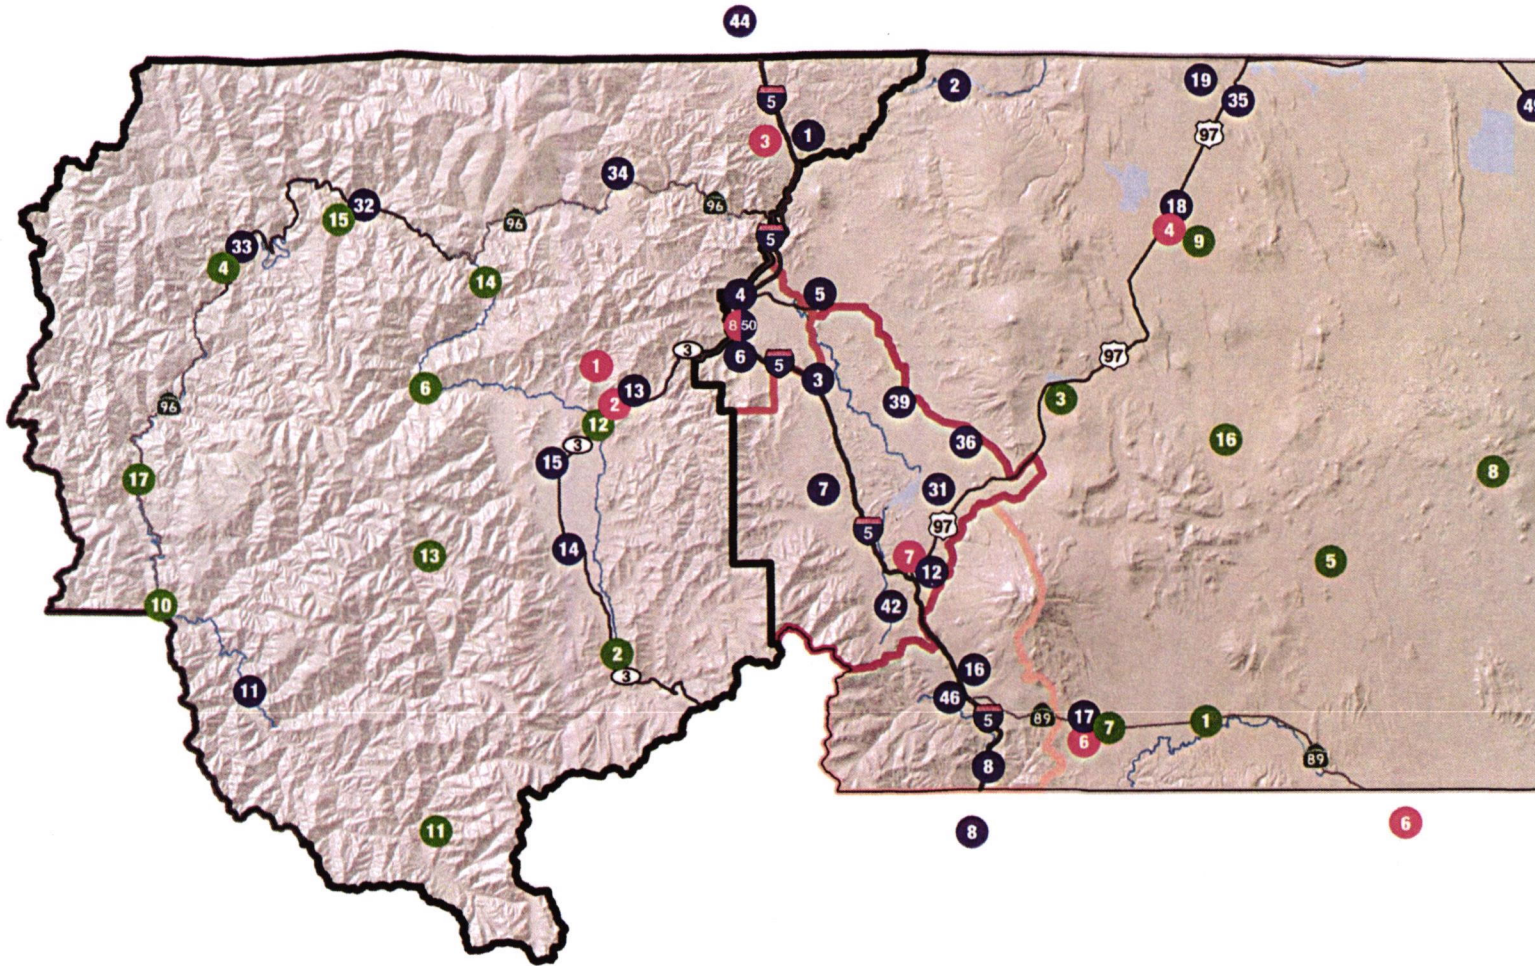

Our Facebook page integrates the computer automated dispatch information as well as useful information for the public which include news stories, weather information and pictures of events that we participate in.

Our Vimeo page is a video library of content that include imagery of incidents, happenings, and recruitment videos.

Finally our website acts as a landing location for all the content we push to the public and a valuable tool for chiefs to locate our recruitment booth, file for reimbursements, and gather any media they may wish to use on their social media outlets.

We'd like to invite all social media users to subscribe to our social media outlets to keep in the loop!

Last Updated in 2018 Report

The Butte Valley Fire Protection District (BTE) was established in 1965. Our coverage area is approximately 33 square miles and has a population of approximately 1000. Our funding sources are from special district taxes, community donations, and our annual BBQ fundraiser.

We have one station and six volunteer firefighters. Our apparatus includes: one 3500-gallon Water Tender (1988), one Type-1 Engine (1984), and one Type-2 Engine (2003).

The Board meets the first Tuesday of every month and training is scheduled for the third Tuesday of every month. Training consists of some controlled burns and we also train with CAL FIRE in the summer, we have completed about 80 hours of training this year. Our main goal to accomplish in the upcoming year is to purchase battery operated extraction equipment.

Last Updated in 2018 Report

The Dorris Fire Department (DOR) was established in 1937. We cover approximately 15 square miles, covering within city limits, North to the Oregon border, South to Butte Valley Airport, East to the Vista Point on Hwy 161 and West to School House Hill. The population is approximately 905. Our funding source is through the City General Fund.

We have one station with 12 volunteer firefighters and one paid staff, for a total of 13 personnel. Our apparatus includes: one 4000-gallon Water Tender (1987), three Type-1 Engines (1985, 1990, 1993), and one Type-6 Squad (2004).

The City Council meets the first and third Mondays of every month and trainings are the first and third Tuesdays of every month.

The McCloud Community Service District (MCU) was established in 1965. Our coverage area is approximately 200 square miles covering from Dead Horse Summit to Snowman's Hill and Harris Mountain to McCloud Reservoir. The population is approximately 1100. Our funding sources are from Special Tax and fundraising.

We have one station with 20 volunteer firefighters, and four auxiliary for a total of 24 personnel. Our apparatus includes: one Type-1 Engine (2007), and an additional Engine (1977).

The Board meets the second and fourth Monday of every month. Training is scheduled every Wednesday. Our goal for the upcoming year is more fundraising and to update our outdated equipment.

The Montague Fire Department (MTF) was established in 1935. Our coverage area for the Montague Fire Department consist with the City of Montague covering 1 square mile and the Montague Fire Protection District that covers 89 square miles. The Montague Fire Protection District contracts with the City of Montague for services. The population is approximately 1550 City and approximately 1000 in the District. Our funding sources are from a special fire tax within the city and district, one fundraiser the Fireman's Association puts on once a year.

We have one station with nineteen volunteer firefighters and three sleepers, for a total of twenty-two personnel. Our apparatus includes: one 4000-gallon Water Tender (1995), three Type-1 Engines (two 1992 & 2002), two Type-3 Engines (1982 and 1993), and one Rescue Vehicle (2008).

The City Council meets the first Thursday of every month. District meetings are four times per calendar year with a 3-person board. Training is scheduled every Thursday with the last Thursday of the month as a business meeting. We were able to purchase a newer type 3 engine this past year as well as acquire another type 1 engine. Our goal for the upcoming year is to obtain new equipment, SCBA's, radios and Bunker gear from grants.

ISO Rating: 5/8B (2017)

The Tulelake Fire Protection District (TUL) was established in 1937. We cover approximately 120 square miles from Hill Road in Siskiyou County to County Road 114 in Modoc County, extending from Stateline Road to Lookout Road to the South. The population is approximately 2234. Our funding source is through property taxes through Siskiyou and Modoc County.

We have two stations with 22 volunteer firefighters, two paid staff and one auxiliary for a total of 25 personnel. Our apparatus includes: two 4000-gallon Water Tenders (1971,1973), one Utility Vehicle (2008), one Type-2 Engine (1985), one Type-3 Engine (2006), and three additional Engines (2001,2005,2007).

The Board meets every third Wednesday. Our challenges are recruitment and meeting the training standards set by the State and maintaining equipment in an area of declining population.

ISO Rating: 4 (MTS 2017) & 5/8B (MSH 2017)

The Mt. Shasta Fire Department (MTS) and Mt. Shasta Fire Protection District (MSH) were established in 1905. Coverage area is 58 square miles with a population of approximately 7165. Our funding sources are from property tax, sales tax, and fire district assessments.

We have four stations with sixteen volunteer firefighters, seven paid firefighters, and two explorers for a total of twenty-five personnel. Our apparatus includes: one 2000-gallon Water Tender, one 3500-gallon Water Tender, one Utility pickup, three Command pickups, three Type-1 Engines, three Type-3 Engines, and a Rescue.

The City Council meets the second and fourth Monday of every month and the District Board meets the third Wednesday of every month. Our goal for the upcoming year is to retain personnel.

ISO Rating: 9/10 (2017)

Last Updated in 2018 Report

The Gazelle Fire Protection District (GAZ) was established in 1985, and the population is approximately 70. Our funding source is through county taxes, auxiliary and fundraising.

We have one station with five volunteer firefighters and one auxiliary member for a total of six personnel. We also have four to five first responders. Our apparatus includes: one Type-6 Rescue (1982), one Type-1 Engine (1981), and one Type-3 Engine (1987).

The Board meets the third Wednesday of every month and training is held every Tuesday. Auxiliary meetings are held as needed. We have spent approximately 400 hours holding various fundraisers, the auxiliary has an annual BBQ every September.

Even with such a small number of volunteer firefighters, we have responded to almost every call in the last three years. Our department goals are to continue to operate and serve the Gazelle Fire District.

Hammond Ranch Fire Zone (HMM)

Fire Chief

David Jenkins

Assistant Chief

Lori Luddon

Address:

8800 North Old Stage Rd.

Weed, CA 96094

Station Number: 4200

Phone Number: 530-938-4200

Email: hrfc@hmm4200.org

ISO Rating: 8B/10 (2017)

The Hammond Ranch Fire Zone (HMM) was established in 1989. Our coverage area is approximately 32 square miles between North Old Stage Road from Shasta Cove to Mussolini Point; College Avenue from Old Stage Road to Weed city limits and West into the Eddy mountains. The population residing in our coverage area is approximately 2000. Our funding source is county tax based. The HMM Firefighters Auxiliary is actively managing private funds to assist with finalizing (radios, decals, etc.) the anticipated purchase of a new water tender with pumper capabilities, as well as updating the station logo. Sam and Chris Ordway donated \$5000.00 to our auxiliary.

We have one station with nine volunteer firefighters, and three auxiliary members, for a total of 12 personnel. Our apparatus includes: one 3680-gallon Water Tender (1997), three Engines [Type-1 (2007), Type-3 (1985), and Type-6 (2001)], one Rescue vehicle (2015), and one Utility vehicle (2012).

The Siskiyou County Board of Supervisors meets the first and third Tuesday of every month. Training is scheduled for every Wednesday. HMM provides prompt all-service fire and medical service to our community. Our goals for the upcoming year are to replace the Type-3 Engine with a pumper capable 3,000 gallon Water Tender, and to maintain, as well as increase, our volunteers (both resident and community).

ISO Rating: 8B/10 (2017)

The Mayten Fire Protection District was established in 1990 in the Big Springs Area. Our District covers the central area of the Shasta Valley from one mile north of Hart Rd. at Harry Cahs Rd. then west toward Grenada to the Shasta River. From there, we go south to Louie Rd., back east to power transmission lines and back north to Harry Cash near Hart. Big Springs Road and County A-12 are primary transportation routes through the Distrit. Our static population is around 1000 residents. Our funding sources are property taxes, fundraising events/donations and grants when possible.

Our current apparatus includes one 4000-gallon Water tender (2008), one Type-3 Engine (1989), one Rescue Squad (1998).

In October of 2019, the Board accepted an application for the Chief position. Chief Adams intends to continue the pride and traditions of the Department. Recruitment and retention of new volunteers is our highest priority. In addition, we continue to upgrade our equipment as well as focus on how we can perform our duties with reduced manpower. We will be partnering with local nonprofit agencies to expand our outreach to our population, on preparedness and issues associated with evacuation of families and pets.

The Board of Directors meet the first Tuesday of each month at our Fire Station/Community Hall.

The Weed Fire Department (WED) was established in 1923. Our coverage area is 4 square miles within city limits and automatic aid covering an additional 15 square miles. The population is approximately 3000. Our funding sources are from the City General Fund and Grants. We have one station with seventeen volunteer firefighters, one paid Fire Chief and one paid Assistant Fire Chief, and one paid part-time firefighter for a total of twenty personnel.

Our apparatus includes two Type-1 Engines E-1210 which is a 1997 Westates HME and E-1211 a 2017 Rosenbauer Commander, E-1212 a Type-4 Engine 2006 GMC Pierce, and two command vehicles C-1200 a 2018 Dodge Ram and C-1201 a 2008 Ford.

The City Council meets the second Tuesday of the month. We have completed approximately 1,200 hours of training. This year we have completed several Fuel Breaks throughout the city. Our goals for the upcoming year are to become an ALS provider for the city and surrounding areas and provide a prevention program through the schools.

ISO Rating: 8B/10 (2017)

The South Yreka Fire Protection District (SYR) was established in 1973. Our coverage area is North to the southern Yreka City limits; South to Cram Gulch; West on Hwy 3 to the base of Forest Mountain; East to Shamrock Road and Rolling Hills Drive. The area in size is about 7 square miles. The population is approximately 1800 with 544 residential homes. Our funding sources are from tax on improvements, local fundraisers and donations.

We have one station with 16 volunteer firefighters, and five auxiliary members for a total of 21 personnel. Our apparatus includes: one 4000-gallon Water Tender (2003), three Type-1 Engines (1988,1994 & 1995), one Rescue Vehicle (2005), and one Type-3 4x4 Engine (1988).

The Board meets the first Wednesday of every month, and training is every Thursday evening. We have completed 200 plus training hours, and meet the SB1207 requirements. We have obtained all the needed rescue equipment to provide animal rescue service. We will be training this spring with other Departments on large animal rescue (LAR). We also provide outreach to homeowners that want to make their homes fire safe. Our goal for the upcoming year is more recruitment and to expand our fire district to the Cram and Guys Gulch area. With the expanded area, our District will be 61 square miles in size and have 652 residential homes. We are also planning building a new Station at the intersection of Cram Gulch Road and Guys Gulch Road. This new station would make it possible for all residents to be within five miles to a fire station, satisfying the ISO rating criteria.

The Fort Jones Fire Department (FT J) was established in 1877. We cover the city limits of Fort Jones and automatic and mutual aid for all calls within the Scott Valley Fire District response area. Fort Jones has a population of approximately 900. Our funding sources are from the City General Fund and fundraising.

We have one station with barracks for sleepers. We have twenty volunteer firefighters, two seasonal firefighters, one paid staff member and eight auxiliary members, for a total of thirty-one personnel. Our apparatus includes: one Truck (2002), one Type-1 Engine (1994), one Type-2 Engine (2008), one Type-3 Engine (1992).

The Board meets the second Tuesday of every month. Training is held every Wednesday; we have 348 basic training hours with some responders having thousands of hours for the year. We received the SAFER Grant for 1 full time position. Our goals for the upcoming year are to increase recruitment, establish a more secure source of funding and to purchase a new Type-1 Fire Engine.

Last Updated in 2018 Report

The Happy Camp Fire Protection District (HAP) was established in 1946. Our coverage area is 12 miles within city limits, 80 miles of mutual aid coverage from Hwy 96 to the Humboldt County Line, plus Indian Creek Road and Greyback Road to Oregon State line. Happy Camp has a population of approximately 1000. Our funding sources consist of the District property tax and County General Fund.

We have one station with 17 volunteer firefighters. Our apparatus includes: one 3000-gallon Water Tender (1977), and two Type-2 Engines (1998,2008).

The Fire Board meets the first Thursday of every month. Training/Meetings are held twice a month on the second and fourth Monday with two to three Saturdays of training a year. This year HAP has acquired new turnout gear for all the firefighters. New lights, turnout lights for all personnel and new ropes for rope gear. Our goals for the upcoming year are to apply for various grants to try to obtain new air packs SCBA's and compressors for refilling such tanks. We would also like to organize a non-profit to do fundraisers, build training stations for more hands-on training and work on mutual aid with other departments and investing on a portable light tower for calls.

ISO Rating: 10

The Salmon River Volunteer Fire & Rescue (CCL) was established in 1986. Our response area is from Forks of Salmon to Highway 96 on the northwest side. We also respond to the northeast side of Salmon River and Forks of Salmon to Idlewild Camp Ground. On the southeast direction the response is Forks of Salmon to Shadow Creek. Salmon River Volunteers also take in the forest 39 road to Black Bear Ranch, Blue Ridge Ranch and Godfrey Ranch area. Our biggest fundraiser is the 4th of July, we have cross cut competition, a horseshoe tournament, sell t-shirt/sweatshirts, and sell burgers and fries among other things.

Salmon River Volunteers have two stations one in Cecilville and one in Forks of Salmon. Salmon River has eight volunteers, three of the members are EMT's while the rest are firefighters. Our apparatus includes: one Type-1 Engine (1981), and two additional Engines (1987, 1988).

The Board meets four times per year. Training is conducted every Tuesday. Our challenges are declining number of volunteers, recruitment and retention, along with funding and training.

Scott Valley Fire Protection District (SVF) was established in 1979. Our coverage area is 847 square miles, population approximately 3500, with the exclusion of Etna and Fort Jones. We currently have 15 Volunteers, 3 paid staff, and 3 Auxiliary Volunteers in the Dalmatians. Our apparatus includes one 250 gallon pump trailer, three 3000 gallon water tenders (2000, 1998, 1998), one 3500 gallon water tender (1993), one 2000 gallon water tender (2000), two Type-1 engines (1995, 1998), two Type-2 engines (1987, 1985), three Type-3 engines (1994, 1987, 1988), and one Rescue Vehicle (2012).

Board meetings are the second Tuesday of every month. Training is scheduled for the second and fourth Tuesdays of each month. We conduct and participate in local training and attend the annual Siskiyou County Interagency Drill Day. Our department has started treating properties to meet statewide 100' defensible space standards in our district protection area. Also, we formed an alliance with Etna Fire Dept. and Fort Jones Fire Dept. to research and negotiate the possibility of consolidating the three fire departments in Scott Valley.

Our goals for 2020 are recruitment and retention of volunteer firefighters, apply for prevention, equipment and facility grants, continue fuels treatment in local areas, and to participate in strike teams where needed.
