Cooperator Agreement No. _____

**MASTER
STEWARDSHIP AGREEMENT**
Between The
COUNTY OF SISKIYOU, CA
And the
USDA FOREST SERVICE, PACIFIC SOUTHWEST REGION
Klamath, Modoc, Six Rivers, and Shasta Trinity National Forests

This Master Stewardship Agreement is hereby made and entered into by and between the County of Siskiyou, hereinafter referred to as “County of Siskiyou,” and the USDA Forest Service, U.S. Forest Service, hereinafter referred to as the “Forest Service,” under the authority and provisions of the Agricultural Act of 2014, Pub. L. 113-79, sec. 8205.

Background: In 2003 Congress authorized the Forest Service and the Bureau of Land Management to enter into stewardship contracts and agreements “to achieve land management goals for the national forests that meet local and rural community needs.” The primary focus of this legislation is to achieve land management goals through stewardship projects awarded under contracts or agreements. Unique to the legislation is the ability to exchange goods for services that meet the land management objectives.

The area addressed in this Master Stewardship Agreement is known as the Siskiyou County Project Area that lies within portions of the Klamath, Modoc, Six Rivers, and Shasta Trinity National Forests, as shown in Appendix B. This area includes an un-estimated number of acres to be treated during the term of this Master Stewardship Agreement.

Historically Siskiyou County was largely dominated by frequent fires that created forests that were adapted to burn at low to moderate severity. The past century of fire exclusion has severely impacted water supplies, forest health, communities, infrastructure, and threatened species throughout Siskiyou County and beyond. Fire suppression over the last 100 years has resulted in a fire deficit landscape that this partnership is working to mitigate. There is a need for treating fuels and altering forest structure to reduce the impacts of catastrophic wildfire to the communities and infrastructure of Siskiyou County. There also exists the need to improve conditions that will serve to improve vegetation, forage, and upper watersheds in both water quality and quantity capacity.

The goal of this agreement is to work together using a variety of funding and implementation tools to complete a variety of projects including those related to fuels reduction, habitat restoration, and vegetation management in an effort to restore fire resilience at the landscape scale. Fuels reduction projects in Siskiyou County will protect, enhance, and restore forest and watershed health, provide community protection and bring economic benefits to the local area.

I. PURPOSE:

The purpose of this Master Stewardship Agreement is to document the cooperative effort between the parties for landscape restoration activities within the Klamath, Modoc, Six Rivers, and Shasta Trinity National Forests that are within Siskiyou County in accordance with the following provisions and the hereby incorporated Template for Stewardship Supplemental Project Agreement (SPA), attached as Exhibit A.

II. STATEMENT OF MUTUAL BENEFIT AND INTERESTS:

The Forest Service is a land management agency dedicated to the wise use and management of National Forest System (NFS) lands, including the responsibility for maintaining and improving resource conditions.

The mission of the Forest Service is this: to sustain the health, diversity, and productivity of the nation's forests and grasslands for present and future generations. As an integral part of this mission, the Pacific Southwest Region's leadership intent and annual prioritization is to retain and restore ecological resilience of National Forest lands to achieve sustainable ecosystems that provide a broad range of services to humans and other organisms. Ecologically healthy and resilient landscapes, rich in biodiversity, will have greater capacity to adapt and thrive in the face of natural disturbances and large scale threats to sustainability, especially under changing uncertain future environmental conditions such as those driven by climate change and increasing human use.

The Siskiyou County Board of Supervisors acknowledges the importance of healthy and resilient ecosystems in and around Siskiyou County for the benefit of all residents, and the industries that rely on the prosperity of the County. The projects developed under this Master Stewardship Agreement are for the purpose of protecting, enhancing, and restoring forest and watershed health, providing community protection and bringing economic benefits to the local area. Projects that would occur under this MSA would include, but not limited to, removing and thinning trees for hazardous fuel treatments and timber stand improvement; vegetation management to enhance wildlife habitat conditions, hand piling and burning; removal and utilization of timber; prescribed fire to improve forest health; meadow, stream, and riparian restoration and protection; water quality enhancement; noxious weed control; road maintenance, reconstruction, and/or removal; and improvement of recreational opportunities (e.g. trails and campgrounds).

As the intensity and number of catastrophic wildfires increase within Siskiyou County and throughout California and the western United States, an emphasis on protecting the forest and connected watersheds is critical to addressing the needs. Siskiyou County works with several agencies, entities and non-profits, including the Forest Service, in an attempt to restore landscapes, forests and watersheds. Multiple projects and collaborative efforts have been formed to increase the work of our federal and private partners to bring back healthy forests within the

Klamath, Shasta Trinity, Six Rivers and Modoc National Forests. The stewardship projects developed under this Master Stewardship Agreement, aside from the landscape and forest benefits will also serve to protect, enhance and restore river systems throughout Siskiyou County. This will also help bring economic opportunities to the local area through the various projects and related activities as outlined above.

This Master Stewardship Agreement will provide an opportunity for the parties to seek funding to expand partnership opportunities, and to garner new and additional support from partners, including but not limited to the timber industry, Federal and non-Federal entities, tribal entities, and County of Siskiyou's members and volunteers. Mission accomplishment for both parties will be furthered by the restoration of natural resources across the landscape.

All projects conceived under this Master Stewardship Agreement will undergo a collaborative process to determine specific habitat improvements. The collaborative process will ensure that the benefits of undertaking restoration activities are mutually beneficial to County of Siskiyou and the Forest Service as well as being beneficial to a wide diversity of interests involved in collaboration.

Both parties share an interest in improving the ecosystem condition and function of the landscape. A healthy landscape provides a variety of benefits beyond the needs of a single species, and therefore benefits both parties.

It is therefore mutually beneficial for the parties to work together to implement landscape restoration and enhancement projects.

In consideration of the above premises, the parties agree as follows:
