Dear [REDACTED]

We are writing to inform you that the Siskiyou Land Trust intends to acquire a conservation easement from Betsy and Michael Stapleton over the French Creek Ranch that adjoins property you own. The proposed project includes permanent protection of agricultural land and is supported by agricultural and ranchland protection programs, including the State of California's Farmland Conservancy Program.

The Siskiyou Land Trust is a 501(c)3 non-profit organization that partners with landowners who are interested in permanent conservation opportunities for agricultural, forest, and wildlands in Siskiyou County. We do this by acquiring conservation easements or land from willing landowners. Depending on a landowner's interest, easements are either purchased from landowners with grant funds or donated by landowners. Generally speaking, a conservation easement is a recorded restriction on title that limits a landowner's ability to subdivide their property or convert it to uses that prevent agriculture from taking place. Each conservation easement is specifically tailored to meet the conservation values present and landowner intentions. An easement may include agriculture land use protections or wildlife corridors by identifying land that will be permanently available for that use. The proposed easement would be held by Siskiyou Land Trust. The land trust becomes responsible for monitoring the promises made in the easement by visiting the land and with the landowners annually to ensure that the purposes of the easement are being met.

Siskiyou Land Trust is supported by annual membership contributions and we welcome all Siskiyou County residents interested in protecting the land resources of this county to join.

Please find enclosed a map with the proposed conservation easement acquisition area outlined. If you have any questions, please write or call Betsy Stapleton at 707-499-7082 or me at 530-926-2259.

Sincerely,

Kathleen Hitt
