### Project Description:

The State Library is offering eligible libraries to participate in a program to improve delivery of library material that we might not be able to provide otherwise. Physical materials (books, audiobooks, and large print material) can be recommended for purchase by patrons. Those suggestions are purchased on Amazon, delivered to the patron at their home, and returned to the library to add to the collection when they are finished.

### Summary:

Based on patron requests only, Siskiyou County Library would purchase library material not currently in our collection through Amazon to deliver to the patron (who will return it to the library when finished).
