The amount will be returned to CONSULTANT when a satisfactory "Final Report-Utilization of Disadvantaged Business Enterprises (DBE), First-Tier Subconsultants" is submitted to the Contract Administrator.
- K. If a DBE subconsultant is decertified during the life of the contract, the decertified subconsultant shall notify CONSULTANT in writing with the date of decertification. Wooley Creek Bridge–Scope of Services

This Scope of Services is an attachment to the Contract between the County of Siskiyou (“LOCAL AGENCY”) and CH2M HILL, Inc. (“CONSULTANT”) generally described as the Wooley Creek Bridge (2C-016) rehabilitation and pier repair project.

CONSULTANT Scope of Services will be performed in two phases. In general, Phase 1 preliminary studies include: performing a field investigation and seismic evaluation; developing a strategy for bridge repair, seismic retrofit and rehabilitation; evaluating expected construction activities and access requirements to implement the repair strategy; and, preparing the Environmental Study Limits (ESL) map and assisting LOCAL AGENCY in completing the Preliminary Environmental Study (PES) form.

In general, Phase 2 will include: performing required environmental studies; preparing plans, specifications and estimates (PS&E) for construction; and providing engineering and environmental support during construction.

The Phase 1 detailed Scope of Services is described below. The Phase 2 Scope of Services will be developed after the extent of repair, retrofit and rehabilitation have been established at the completion of Phase 1.

Phase 1 – Preliminary Studies

Task 1–Project Management and Administration

Kickoff Meeting and Project Startup

CONSULTANT will arrange a kickoff meeting with LOCAL AGENCY to review the project scope, schedule, design standards, environmental, and public involvement considerations and to define the key project issues, goals, and critical success factors. CONSULTANT will develop and circulate an agenda for the kickoff meeting, arrange for the appropriate individuals to attend, and prepare and distribute meeting notes.

Project and Field Safety Instructions

CONSULTANT will prepare written Project Instructions to identify project-specific design guidelines to be used by the design team and reviewers. The Project Instructions will identify procedures to independently check, update and back check all project deliverables.

CONSULTANT will prepare Field Safety Instructions identifying hazards which may be encountered during field activities, describing hazard avoidance and mitigation, and providing guidelines for procedures to be followed in the event of an emergency in the field.

Project Coordination

CONSULTANT will hold project coordination meetings if necessary with LOCAL AGENCY staff to review project status, discuss and resolve critical issues, and develop action items to facilitate project completion. CONSULTANT will develop and distribute meeting agendas,

facilitate the meetings, and record and distribute meeting notes. Up to two coordination meetings are assumed during Phase 1.

Budget and Schedule Control

CONSULTANT will prepare brief written monthly status reports and invoices to document work performed during that period. CONSULTANT will identify scope, schedule, and budget issues along with recommended solutions. Anticipated activities for the coming month will be identified to allow LOCAL AGENCY to independently assess overall progress.

Task 2--Preliminary Engineering Studies

Field Investigation

CONSULTANT will visit the site to review above ground as-built plan details and the conditions described in the Caltrans Bridge Inspection Report. CONSULTANT will collect photographs to document current conditions and confirm the consistency of dimensions and details with the as-built plans. CONSULTANT will prepare a technical memorandum to document observed field conditions.

Seismic Evaluation

CONSULTANT will perform an analysis to assess the structure's anticipated performance in a seismic event. It is anticipated the structure will be modeled using CSiBridge software, or similar, to determine member forces and displacements effects due to dead load, live load and seismic demands acting on key elements including superstructure, bearings, cap beams, columns, footings and abutments. Member capacities will be estimated using as-built records and compared against force demands. Capacity/demand (C/D) ratios will be summarized for individual elements, and C/D ratios less than 1.0 will be highlighted.

Repair, Retrofit and Rehabilitation Strategy Report

CONSULTANT will prepare a Repair, Retrofit and Rehabilitation Strategy Report summarizing the findings of the field investigation and seismic evaluation. The report will include a summary of seismic vulnerabilities, recommendations for repair, retrofit and rehabilitation measures to be carried forward into Final Design. CONSULTANT will submit a draft report to LOCAL AGENCY for review and comment and finalize the report after meeting with LOCAL AGENCY staff to discuss and finalize the recommendations.

Task 3--Preliminary Environmental Studies

Environmental Studies Limit Map

CONSULTANT will determine construction activities and site access requirements anticipated to implement repair, retrofit and rehabilitation measures developed in Task 2. Based on these results, CONSULTANT will conduct a one-day site visit with LOCAL AGENCY and Caltrans to review anticipated work and disturbance areas. CONSULTANT will then prepare the Environmental Study Limits (ESL) map, the basis of which will be used to develop the area of potential effect (APE) map. ESL map development will consist of coordinating the map format with LOCAL AGENCY and Caltrans and preparing a draft

ESL map for review and comment. CONSULTANT will finalize the ESL map based on LOCAL AGENCY and Caltrans comments, and submit the final version in hard copy (11x17) and PDF electronic format.

Preliminary Environmental Study Form

CONSULTANT will be available to assist LOCAL AGENCY in preparing the preliminary PES form. Following the project site visit, CONSULTANT will conduct a meeting with LOCAL AGENCY to review the PES form. Meeting participants will discuss each element of the checklist, review and comment on the ESL map, identify required technical studies, and complete the PES form. Meeting will be conducted via Skype or conference call at LOCAL AGENCY's preference. It is assumed that LOCAL AGENCY will prepare the final PES form to submit to Caltrans for approval.

Phase 2 – Environmental Studies and Final Design

The CONSULTANT Scope of Services and fee for Phase 2 will be negotiated at the completion of Phase 1 when the extent of repair, retrofit and rehabilitation is more clearly defined.
