### Project Description:

This is a new grant cycle (July 1, 2022 to June 30, 2027) of the existing Local Oral Health Program. The LOHP focuses on education, disease prevention, community-clinical linkages, and surveillance of overall dental happenings in the community, among other things.

### Summary:

Grantees shall establish or expand upon existing LOHPs by including program activities related to oral health in their communities. These activities will improve the oral health of Californians. This goal shall be achieved by providing funding for activities that support demonstrated oral health needs and prioritize underserved areas and populations. The target for community-clinical linkages will be that a minimum of 50% of eligible schools will have a dental program by 2027. Development, submission, and
