Initial screening of standard laboratory tests at RTL will be performed by enzyme immunoassay (EIA). Screening and confirmation methodologies, as well as cutoff levels, vary by drug or metabolite and are subject to change at RTL's discretion. Panel codes and testing equipment are also subject to change. Drugs available in the standard panels vary by panel code.

When laboratory confirmation tests are requested following a screen, they will be performed on an independent portion of the original specimen using gas chromatography-mass spectrometry (GC-MS), liquid chromatography-tandem mass spectrometry (LC-MS/MS), or gas chromatography-gas flame ionization (GC-FID), depending on drug class. GC-FID is used only on samples requiring alcohol (EtOH) confirmation. Confirmation on positive screens for the drugs included in the panel are available at the prices listed above. Separate fees will be incurred for confirmations performed on drugs that are not part of a standard panel, and for designer or esoteric drugs. Confirmation methodologies, as well as cutoff levels, vary by drug or metabolite and are subject to change at RTL's discretion. Panel codes and testing equipment are also subject to change.
